

EXAMPLE - Spatial Reference Layer for Shared Decision Making

This map provides information to assist in determining the appropriate level of engagement required between BC and the TRTFN under shared decision making arrangements. The shading on the map delineates areas with varying degrees of susceptibility to disturbance from land use activities based on values found in that location, as shown in Table 1, below.

Attributes	Category A	Category B	Category C
LUP areas not identified below			
Tlatsini areas			
RMZs			
High value grizzly spring or fall habitat			
High value sheep winter and lambing habitat			
High value caribou winter and calving habitat			
High value goat winter and kidding habitat			
1 km buffer around lakes greater than 140 Ha			
Critical Aquatic Habitat Areas			
Salmon Ecosystem Management Area			
Category A Cultural Sites			
Category B Cultural Sites			
Category C Cultural Sites (high value sites in proposed PA)			
BC Archaeological Sites with 200m buffers			
Nakina Trail with 2 km buffer either side			
Rare and Sensitive Ecosystems			
Land Selection Areas			

Consistent with the Engagement Model described in the *BC-TRT Agreement on Land and Resource Management*, the level of engagement required for shared decision making is based on the Category shown in this spatial reference layer and the type of activity proposed in a given location, according to the Engagement Matrix below. Activity Types I-IV for different resource sectors are described in detail in the *BC-TRT Agreement on Land and Resource Management*.

Category	Activity Type			
	I	II	III	IV
A	Level 1	Level 2	Level 2	Level 4
B	Level 1	Level 2	Level 3	Level 4
C	Level 2	Level 2 or 3	Level 3	Level 4

Level 1 engagement involves notification only. Level 2 engagement involves discussions between BC and Tlingit technical staff, with support from the Engagement Coordinators. Level 3 engagement involves a Joint Technical Meeting of the relevant BC and Tlingit technical staff, with support from the Engagement Coordinators. Agreed timelines for engagement at these various levels are set out in the *BC-TRT Agreement on Land and Resource Management*.

DISCLAIMER

Information on this map has been provided for the sole purpose described above and should not be used for other purposes. The data layers on which this map is based are subject to refinement over time, as additional information becomes available. Users of this map are cautioned that the resolution of some data layers is such that more detailed mapping of land use values in some locations may be needed to ensure informed decision making.
